Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 February 2010.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.

DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of species I, claims 1-2, 4-5, 11, 14 and 17-18 in the reply filed on 2/12/2010 is acknowledged. The traversal is on the ground(s) that there would be no serious burden on the examiner if examine all the species. This is not found persuasive because other species/embodiment require further search and/or reconsideration in other area. Claims 17-18 depend on non-elected claims 6-7. Claims 1-2, 4-5, 11 and 14 will be examined herewith.

The requirement is still deemed proper and is therefore made FINAL.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(c) he has abandoned the invention.

Claims 1, 4-5 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 3724349 A1.

DE 3724349 A1 discloses a rotary transformer [figures 1-2] comprising:

- at least one primary coil and at least one secondary coil [3, 6], wherein the primary and secondary coils are each divided into at least two separate winding sections [figure 2], these winding section interengaging in the manner of a comb;
- at least an air gap formed between the winding section;

- two core halves [2, 5] supporting the primary and secondary coils, wherein the core halves are designed to be essentially symmetrical and each core half comprises a base plate having an integrated formed outer ring and an integrally formed inner cylinder or an integrally formed inner ring.

Regarding claim 11, DE 3724349 A1 inherently discloses winding terminals for the secondary and primary coils [figure 2.]

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over DE 3724349 A1 in view of EPO 0680060 A1.

Regarding claim 2, DE 3724349 A1 discloses the instant claimed invention except for the specific arrangement of the winding section relative to the axis of rotation.

The specific winding section arrangement relative to axis of rotation would have been an obvious design consideration based on the intended applications/environments use.

Regarding claim 14, DE 3724349 A1 discloses the instant claimed invention except for a central hole in the core halves.

EPO 0680060 A1 discloses a rotary transformer using a pair of core halves having a central hole.

It would have been obvious to one having ordinary skilled in the art at the time the invention was made to use the core halves design of EPO 0680060 A1 in DE 3724349 A1 for the purpose of providing mounting option.
